DATA ANALYTICS | BUSINESS INTELLIGENCE | SQL | POWER BI | PYTHON | PROCESS IMPROVEMENT

PROFESSIONAL SUMMARY

Computer Science and Business Entrepreneurship graduate with hands-on experience in data analytics, business intelligence, operational reporting, SQL databases, dashboard development, and process improvement. Skilled at transforming operational data into clear insights, reports, and recommendations that support business decisions. Bilingual in English and Spanish.

CORE SKILLS

Analytics & BI: Power BI, Tableau, Excel, KPI reporting, dashboards, trend analysis, data visualization, reporting QA
Data: SQL, SQL Server, PostgreSQL, Supabase, Python, pandas, scikit-learn, data validation, ETL concepts, relational data modeling
Business Analysis: requirements analysis, process improvement, operational reporting, stakeholder communication, workflow analysis
Tools: Microsoft Office, Git, GitHub, Vercel, Google Workspace, ClickUp

EXPERIENCE

Founder & Software Developer - Bonaro Tech | Phoenix, AZ | 2026-Present | Part-time business project

- Translated business needs into documented workflows, system requirements, analytics tracking, and customer-facing solutions across lead capture, booking, communication, and automation processes.
- Tested releases, diagnosed issues across APIs and data-routing workflows, and created process documentation to improve reliability and support repeatable operations.
- Used analytics, issue tracking, process reviews, and stakeholder feedback to identify operational gaps and support data-informed improvements.

Co-Founder & Business Analyst - ALOY Commercial LLC | Phoenix, AZ | 2022-June 2026

- Analyzed supplier costs, pricing, sales, shipment activity, inventory movement, revenue, and margin performance across 13,000+ SKUs using Excel-based reporting workflows.
- Reviewed supplier, customer, purchase, shipment, and inventory records to identify inconsistencies, improve reporting accuracy, and support operational and financial decisions.
- Organized supporting data and communicated findings to support purchasing, vendor, customer, and pricing decisions.

ANALYTICS & BI PROJECTS

MakMex Data & Pricing System - GCU Capstone, Team Lead | 2025-2026

- Led a 4-person capstone team and designed the PostgreSQL/Supabase data model for an operating tools business, migrating 13,000+ product records from Excel across products, multi-warehouse inventory, dated price history, kits, and combos.
- Built SQL views for condition-based pricing and bundle availability; audited the live database, fixing a join error that overstated kit availability (3,355 → 492 kits) and removing public access to customer data.

Fire & EMS Data Warehouse - GCU Analytics Project | 2025-2026

- Developed Python and SQL workflows to clean, transform, and validate operational data for analysis and reporting.
- Built Power BI and Tableau dashboards tracking response times, call volume, resource utilization, and operational KPIs; presented trends and findings to technical and non-technical audiences.

Predictive Pricing & Revenue Optimization - Python Analytics Project | 2026

- Built a Python ML pipeline (Random Forest) to predict demand from pricing, discount, and seasonality signals on a 10,000-row synthetic dataset, reducing forecast error ~82% vs. baseline; simulated discount scenarios to compare revenue and margin tradeoffs.

LEADERSHIP & CUSTOMER EXPERIENCE

Team Lead & Server - Panda Express & Zipps Sports Grill | Phoenix, AZ | 2021-2026

- Supported high-volume operations, trained team members, resolved customer issues, coordinated across teams, and maintained accuracy and professionalism under deadline and service pressure.

EDUCATION & CERTIFICATIONS

Grand Canyon University - B.S. Computer Science and Business Entrepreneurship, 2026 | Honors College | President's Scholarship
Certifications: Google Data Analytics Professional Certificate | Foundations of Business Intelligence
Relevant Coursework: Database Systems, Analytics, Requirements Analysis, Software Engineering, Data Structures & Algorithms
